

Environmental Policy Statement

Pollock Cranes have identified our main environmental issues as being the disposal of waste; efficient use of raw materials and the use and conservation of energy and water.

Pollock Cranes endeavor to continually improve our environmental performance so that the risk and significance of environmental harm caused by our activities is minimised.

Pollock Cranes will comply with the law and seek to do better than the legal minimum.

Pollock Cranes will use appropriate environmental and technical standards to improve our environmental performance.

Pollock Cranes will share information with our suppliers and sub-contractors and require that they have policies consistent with our own.

Pollock Cranes supports the aims of this Policy Statement by ensuring resources, roles and responsibilities are appropriately allocated and managed.

Pollock Cranes aim to make decisions that address the above issues in an environmentally considerate and efficient manner without compromising our service to our customers.

“Right Culture, Right People, Right Systems”
