A handshake is still a contract and what we say, we do.

Over the past decade, Pollock Cranes has gone from strength to strength, thanks to our loyal and dedicated clients.

As they've grown, we've grown with them, expanding our business to meet the demand. With branches now in Tauranga, Hamilton and Auckland, we can service the far North to central North Island with some of the largest and highest capacity cranes and heavy transport equipment in the country.

What makes Pollock Cranes different is our excellent company values and solutions-focussed approach that never compromises on health and safety. There are multiple ways to complete a job – but, for me and my team, the only right way is to ensure it is completed safely, with correct risk and hazard management.

Our people truly are one of our biggest assets. I am proud to lead such a skilled, motivated workforce, who are the face of our business every day. Our reputation is based on these skilled people, as well as having innovative, well-presented equipment in the market.

This equipment gives us the ability to offer turnkey solutions to our clients, with one point of contact keeping clear lines of communication at all times.

When it comes to our clients, they are all treated as partners and we work collaboratively to achieve the same goals for every project: To ensure it is undertaken as efficiently as possible, with health and safety driving the decisions we make.

Pollock Cranes will continue to grow to meet our partners' demands in the future. We are a 24/7 operation and our phones are always on, ready to provide a solution for your future project or situation.

We look forward to your future partnership.

Wayne Slater
Managing Director

Never say no, just make it happen.

- Rex Pollock

Pollock Cranes has a long history of meeting our clients' needs. Established in 1965, Pollock Cranes started (as many great businesses do) over a beer in Greerton, Tauranga, between Alan Todd and Rex Pollock. Then a construction company titled Todd & Pollock Builders Limited, the team built much of the infrastructure in the Tauranga area, including bridges, houses, multi-storey apartments, reservoirs and service stations.

When Rex couldn't hire a crane for one of his building projects, he decided to buy one of his own. It wasn't long before he quickly purchased a second when everyone wanted to hire his first (leaving him with no crane of his own).

Seeing an opportunity to support the industry through crane and haulage hire, Rex took over the business and steered Pollock Cranes towards a new era. Demand for the business grew, and what started in Tauranga has since expanded to Hamilton in 2009 and Auckland in 2013 to better service the wider North Island (and beyond).

With his children Wayne, Thomas and Casandra at the helm (and his wife, Cheryl, taking a background interest as well), the business has remained a family affair following Rex's passing in 2015. Rex was always a man of his word, the kind of man who did deals with a handshake. Pollock Cranes is built on the values this represents: Integrity, trust and honesty. These values extend not only to our clients, but our 60-plus staff as well – Rex always said the business was only as good as its people, and this mantra is an integral part of our culture to this day.

We believe in working as a team and see our team as trusted partners in your business. When you work with Pollock Cranes, you know you're in good hands and your project will be well cared for. We enjoy seeing our clients thrive and revel in your success as much as our own.

Our mission is...

... to provide our clients with the highest quality experience. Our clients and employees are our greatest asset, and we pride ourselves on an unwavering commitment to serve them, through excellent service, continual employee development and a social responsibility to support our community.

At Pollock Cranes, our values are:

- Right people
- Right culture
- Right system

RIGHT PEOPLE

As a family owned business, family values are integral to our business. Our team are highly trained, highly skilled people who enjoy the opportunities and family orientated environment that Pollock Cranes offers. It's this approach that we attribute to our high staff retention rate.

RIGHT CULTURE

We've created a unique workplace culture of mutual respect, fair treatment and a universal support network where everyone helps everyone. The owners never ask anyone to do something they wouldn't do and our 'no man left behind' policy ensures our people feel valued in their role.

RIGHT SYSTEM

Working with large machinery can be a complex and challenging task, and we pride ourselves on exceptional health and safety practices. We have an impeccable safety record, driven by our solutions-focussed staff. Our pre-site planning ensures elimination of any hazards before the work commences and our staff undergo continual training and development, to ensure they are not just meeting standards, but exceeding them.

Our people.

Where industry experience and youthful exuberance meet, Pollock Cranes has an exciting workforce of hard-working and dedicated team members.

With the majority of the team in their thirties, they are hungry for new opportunities and progress, and with their energy comes innovative, exciting new ideas that are helping the growth of our business and the industry at large.

While our team members come from all walks of life, they are driven by a shared passion for client satisfaction. We employ people who are calm under pressure and who can perform in challenging situations, creating a team of like-minded individuals. All team members have access to ongoing training and

support, to ensure they are operating at the highest standard at all times.

At Pollock Cranes, we have a desire to support the next generation of operators in the industry and have developed the Rex Pollock Apprenticeship Scheme. This on-the-job training is a five-to-six-year programme that helps apprentices gain a licence to practise in a regulated profession. Each year, we take on two to three apprentices, with a view to them achieving the required NZQA qualifications and becoming industry ready at the completion of their time with us. It's our way of giving back to the community and ensuring we're keeping these high-calibre skills alive.

Our services.

LARGE FLEET OF MODERN MOBILE & CRAWLER CRANES

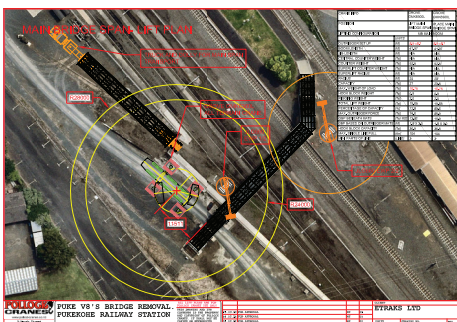

No matter what your project, we pride ourselves on having the equipment you need to get the job done. With a well-maintained, modern fleet of mobile and crawler cranes on offer – including the highest capacity crane in New Zealand – we can service the entire North Island (and beyond) 24 hours a day, seven days a week.

I haven't used another crane company for the last 10 years. I haven't even bothered to pick up and call anyone else.

Wayne and his team are fantastic to deal with and when it comes to planning, coordination and delivery of the works, they are active participants in the safety planning and risk assessments in the field.

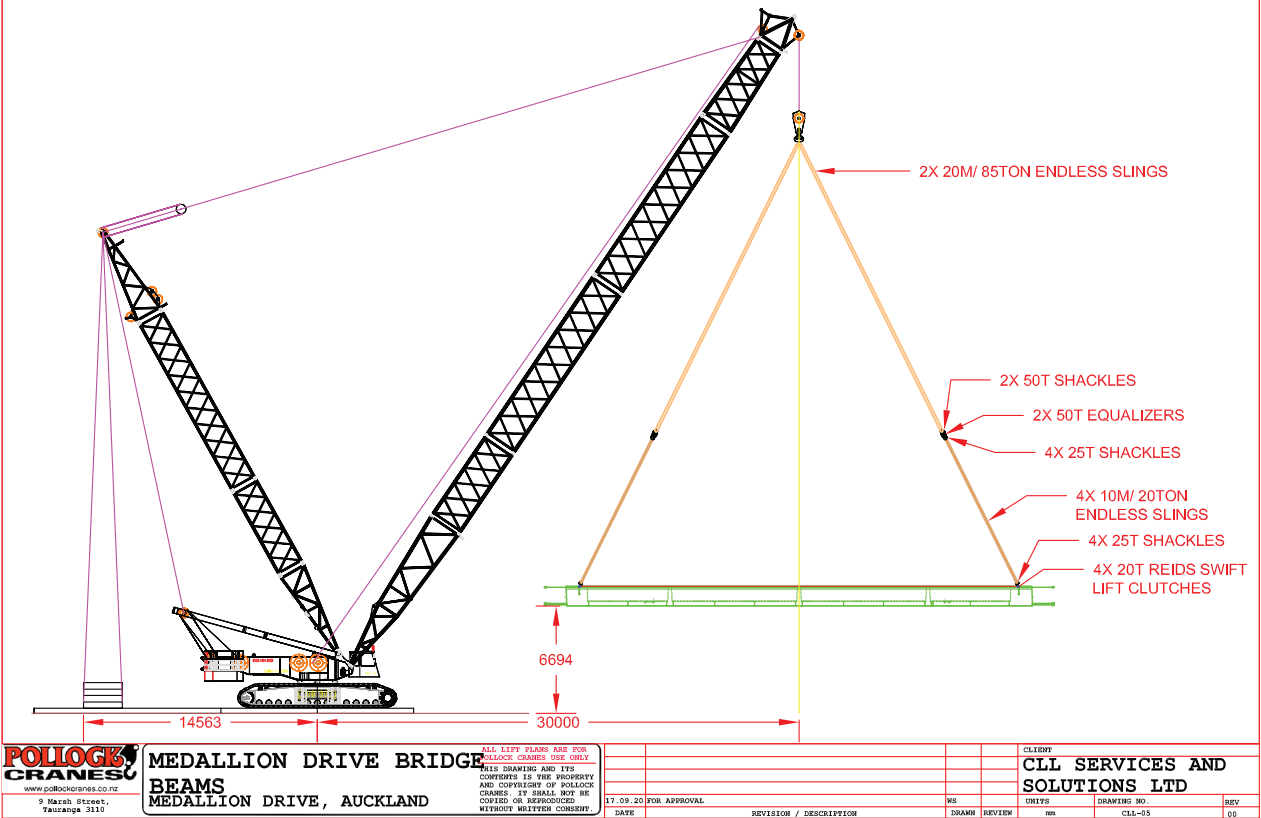

They provide both technical knowledge and real world experience in developing the most efficient and safe methods of working. Their operators and riggers are easy to communicate with, and easily become valued members and contributors to any project team.

– Greg Dewe (Contract Manager)

BRIDGE BEAM MO8- LIFT PLAN SIDE ELEVATION

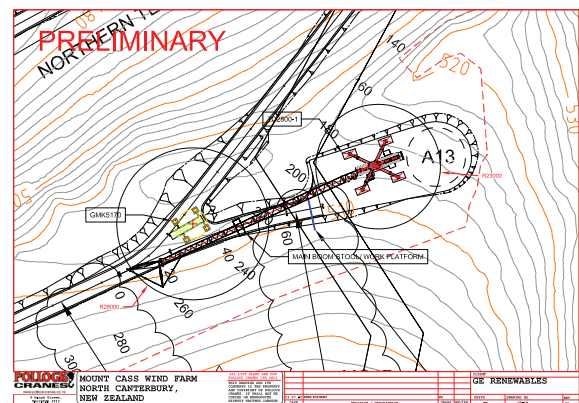

CRANE TRANSPORT AND PLACEMENT

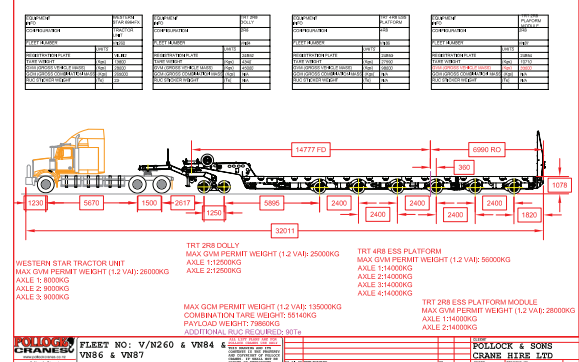

Our team provide a complete turn-key solution, making the transport and placement of your mobile, crawler, tower or self-erecting crane easy and efficient. From initial site inspection to project completion, we will support your needs all the way. Our service includes comprehensive site inspections, methodologies, transport plans, CAD lift plans, crane hire, transportation and assembly or disassembly of your crawler crane.

Our rigging crew has extensive knowledge and experience with all makes of crawler cranes. Each team member has the required qualifications to undertake this work:

- NZQA Rigging & Crane Qualifications
- Site Safe Passports
- Working at Heights Certificates
- Forklift Licences
- First Aid Certificates
- Construct Safe.

VN260 & VN84 & VN86 & VN87 INFO

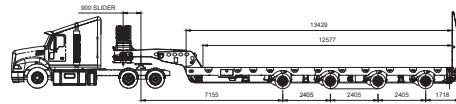

HEAVY HAULAGE

Complementing our crane hire services, our heavy haulage options provide another level of support for our clients' projects. Our experience and history in the transport industry makes Pollock Cranes well-placed to deliver this service, giving clients comfort and confidence that their equipment, product or cargo is in safe hands while in transit. We are capable of transporting over dimension and overweight loads on the latest generation transport equipment with a capacity of up to 190 tonnes. This includes supplying our own certified pilots for customers throughout New Zealand. With complete transport and crane logistic solutions on offer, we can put together a cost-effective option and ensure all aspects of your project are taken care of.

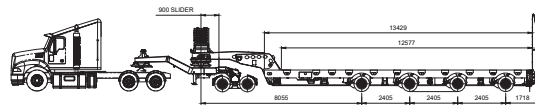

I have worked with Pollock Cranes for more than a decade, and in this time I have met and worked with nearly all personnel in the company. Every individual at Pollock Cranes strives for excellence and has a huge passion for the equipment they are working with. They have never let me down and have a 100% incident free safety record, while working on my sites. Alongside this top safety record they deliver with speed and accuracy, always saving time and money. They come well equipped for every job with the gear always in top shape. I would have no issue recommending Pollock Cranes as I know they will deliver.

— Campbell Upperton (Engineering Services Manager)

PRE-CAST CONCRETE AND PLACEMENT PACKAGES

Our pre-cast erection packages can include as little or as much support as you need, from design and manufacture to the final product being installed. Our comprehensive service is inclusive of transportation, deadman, propping, crange, height access and installation crew, ensuring the pre-cast is delivered and installed to your satisfaction. Our dedicated team of professionals will comply with all in-depth transport and crane studies, methodologies, lift plans and SSSPs, and have the experience and skills to see the job done right.

Each team includes the following personnel and equipment:

- Elevated Platform Certificates
- Forklift Licences
- First Aid Certificates
- NZQA Rigging Certificates
- All permits, certificates, lift charts and other supporting certificates/documents
- First aid kit held in every vehicle
- Fire extinguisher held in every vehicle.
- Experienced erecting team, including qualified welders
- Site Safe Passports
- Construct Safe
- Working at Heights Certificates

Logistics.

Our new MPI ATF pad in Tauranga gives us the ability to move import containers, machinery and parts for devan/unload, which is a service we make available to our clients. Well supported by our crane and heavy haulage divisions, we have the capability to lift and deliver over-dimensional cargo throughout New Zealand as the permitting rules allow. We can also pack for export at our ATF pad, which is the same service in reverse.

This gives Pollock Cranes the advantage of being a one-stop-shop for our existing and new customer base. As well as this, we have the capacity to tackle any size that fits out of the Port of Tauranga, located

just 500m away from our ATF pad. As we are independent we can work with a myriad of freight forwarders, and utilise our equipment to help solve their clients' import issues.

- MPI approved facility
- 3 approved AP staff
- Storage facility available for layover
- CCTV site for safety and product security
- Large range of certified lifting gear available onsite
- Experienced NZQA standard operators.
