

Environmental Policy

At Pollock Cranes environmental protection and sustainability is a fundamental part of our business.

Aims:

Our aim is to prevent any environmental risk to people and the environment.

Objectives:

To ensure excellence in environmental and sustainability Pollock Cranes will:

- Control pollutant emissions, noise and dust, and the use of potentially harmful substances and treatments during activities
- Ensure staff are properly trained in all aspects of use of hazardous substances, including appropriate methods of storage and disposal
- Comply with environmental legislation and resource consents
- Integrate environmental issues in the planning and decision-making process
- Conserve energy through sensible selection, use and management of resources, equipment, plant and transport
- Use resources such as energy, water, raw materials and consumables as efficiently as practicable and minimise the amount of waste generated
- Use and re-use materials to minimise waste and, whenever practicable, use materials and products from sustainable sources
- Work with clients, subcontractors and suppliers to improve combined environmental performance within our industry
- Achieve environmental improvements through performance monitoring
- Continue development, monitoring and investigation of environmental systems, practices and procedures to ensure compliance and best practice

Policy Review:

- This policy has immediate effect and replaces all previous versions.
- This policy will be reviewed and amended every 2 years, or as necessary.
